**Karl F. Schmid : Construction Crew Supervision: 50 Take Charge Leadership Techniques Light Construction Glossary** before purchasing it in order to gage whether or not it would be worth my time, and all praised Construction Crew Supervision: 50 Take Charge Leadership Techniques Light Construction Glossary:

0 of 0 people found the following review helpful. Great little bookBy JTGreat little book, the author hits most construction leadership ideas right on the money. Even experienced supervisors and foreman can benefit from reading

this book even if to recap what you have already learned in the field.0 of 0 people found the following review helpful.  
GOOD STUFFBy Big Builder 2005GOOD READING FOR ANYBODY IN CONSTRUCTION

In this construction supervisor's pocket-sized manual, construction managers and field supervisors alike will find a concise tool kit of leadership skills to motivate and marshal workers onsite. It provides solid, common sense guidelines to preempt, use, and refer to, as problems arise-from unexpected work stoppages to getting better performance and productivity from all. It provides quality tools specifically intended for construction crew supervisors, who have one of the toughest leadership job of all: managing workers with a wide range of skills under difficult and sometimes dangerous work conditions. The accompanying glossary of common light construction terms and phrases will also be of immense help when one is faced with unfamiliar items and procedures on the job site. The book can also be used in the classroom as a useful adjunct to more traditional texts on construction management.
