Required reading!By Andrew LubinFinally - a business book that is both interesting AND accurate!First-time author but long-time executive David Fater's book covers all the essentials needed in business today: from incorporating to raising funds to going public, Fater walks the budding entrepreneur through the minefields of business and gets him or her pointed in the right direction."Entrepreneurship is about taking

risk," Fater so accurately starts his book, and in today's cut-throat financial environment, the successful entrepreneur learns how to minimize that risk. How to best run your business - as a corporation, an LP, or an LLP? How to find money - and not lose control of your dream? Does one go public - can one go public? While the answer to each question depends on what are the entrepreneur's goals, Fater describes the pros and cons of these and other equally important questions in a remarkably relaxed and readable style. This book should be required reading in any reputable B-School, as well as any SCORE, SBA, or state economic program catering to start-up businesses. Well Done !!! of 1 people found the following review helpful. For new entrepreneurs to Corporate Executives By Norman Lacasse David Fater is a Giant in the industry. More than 40 years of experiences are shared in his new book. I like when he said : " Typical entrepreneurs surround themselves with people against which they can shine. The smartest Chief Executive Officers (CEOs) are those who surround themselves with people who are smarter than they are, which lets them accomplish their vision." David Fater is one of the person you need to be surrounded with. This is the "Go To" person.
