**John S. Page : Estimator's Piping Man-Hour Manual (Estimator's Man-Hour Library)** before purchasing it in order to gage whether or not it would be worth my time, and all praised Estimator's Piping Man-Hour Manual (Estimator's Man-Hour Library):

1 of 1 people found the following review helpful. got to have one of these in the bookshelf!By just daveThe estimating

standard all refer to. Could be priced a little lower after all these years though!1 of 1 people found the following review helpful. Really good referenceBy LectorThis book is a great reference to avoid any guesstimating and to estimate MH's on handling, cutting, beveling, field welding, bolting up accessories. I really recommend this if you are estimating piping work. It is based on steel material so this is not good for iron pipelines.0 of 0 people found the following review helpful. Five StarsBy Harlan R Russell III Loved it

This reference provides reliable piping estimating data including installation of pneumatic mechanical instrumentation used in monitoring various process systems. This new edition has been expanded and updated to include installation of pneumatic mechanical instrumentation, which is used in monitoring various process systems.

About the AuthorJohn S. Page has wide experience in cost and labor estimating, having worked for some of the largest construction firms in the world. He has made and assembled numerous types of estimates including lump-sum, hard-priced, and scope, and has conducted many time and method studies in the field and in fabricating shops. Mr. Page has a B.S. in civil engineering from the University of Arkansas and received the Award of Merit from the American Association of Cost Engineers in recognition of outstanding service and cost engineering.
