**Derek Truscott, Kenneth H. Crook : Ethics for the Practice of Psychology in Canada, Revised and Expanded Edition** before purchasing it in order to gage whether or not it would be worth my time, and all praised Ethics for the Practice of Psychology in Canada, Revised and Expanded Edition:

0 of 0 people found the following review helpful. well worth the readBy Amy TaylorVery easy to read, well written. Clear and concise. A valuable resource!

In this new edition of the groundbreaking *Ethics for the Practice of Psychology in Canada*, content is both revised and expanded. Continuing to fill a vital need for a Canadian textbook, the authors focus on major ethical issues faced by psychologists, including obtaining consent, protecting confidentiality, helping without harming, providing services across cultures, promoting social justice, and conducting research, while incorporating the Canadian Code of Ethics for Psychologists. Each chapter includes case studies for practicing ethical decision-making, and a reflective journal to provide an opportunity for awareness of personal motives and biases relevant to making ethical choices. Written primarily for students in professional psychology graduate programs, the book is also ideal for anyone preparing to practice in Canada or for experienced psychologists seeking to maintain or enhance their ethical knowledge, skills, and integrity.

"Given its reliance on the CPA Code of Ethics, its readability, and its thoroughness, the book is an excellent textbook or reference book for senior undergraduates and entry-level graduate students, as well as for practitioners wishing to renew their acquaintance with the range of ethical questions they encounter in their practice.... In the Preface the authors outline their goals for the book, which briefly stated include increasing ethical and legal knowledge, raising awareness of ethical issues in practice, promoting ethical decision-making skills and the ability to solve ethical dilemmas, and fostering the development of a professional ethical identity. These goals have been met and exceeded in this book. The authors provide knowledge of ethical concerns to practicing psychologists, researchers, and academics in a well-written book that is very readable and interesting." , *Canadian Psychology*, 2014, Vol. 55, No. 1 [Full review at DOI: 10.1037/a0035674] (David R. Evans *Canadian Psychology* 2014-10-01)From the Back Cover*Ethics for the Practice of Psychology in Canada* covers what is expected of Canadian psychologists from the unique perspective of how to be ethical. In this new edition of the essential *Ethics for the Practice of Psychology in Canada*, content is both revised and expanded. This authoritative resource continues to fill a vital need for a Canadian textbook, while incorporating the Canadian Code of Ethics for Psychologists. The authors address the key ethical issues and all of the competencies required for registration in every Canadian jurisdiction, including making ethical decisions, identifying and resolving ethical dilemmas, meeting professional standards, appreciating legal expectations, maintaining professional boundaries, and conducting research. Each chapter presents case studies for practicing ethical decision-making, while reflective journal activities provide an opportunity for awareness of personal motives and biases relevant to making ethical choices. Written primarily for students in professional psychology graduate programs, this book is also ideal for anyone preparing to practice in Canada or for experienced psychologists seeking to maintain or enhance their ethical knowledge, skills, and integrity.About the AuthorDerek Truscott is a Professor in the Department of Educational Psychology, Faculty of Education, at the University of Alberta. He has published and presented extensively on psychotherapeutic processes, ethics, and standards of practice. Derek lives in Edmonton. Kenneth Crook (1960-2008) was a trial lawyer with a Vancouver law firm. He lectured and wrote extensively in the areas of insurance law, civil procedure, and medical malpractice.
