**Water Environment Federation : Green Infrastructure Implementation** before purchasing it in order to gage whether or not it would be worth my time, and all praised Green Infrastructure Implementation:

Green Infrastructure Implementation provides actionable information that promotes the implementation of green infrastructure. Unlike most publications, which focus on technical design of individual green elements, this book tackles topics that relate directly to the ability to implement green infrastructure. The collection of programmatic and planning topics is unique in current literature, and covers a range of issues from stormwater to public education. Green Infrastructure Implementation identifies obstacles and provides guidance in possible approaches to overcoming them

at the programmatic level. It also provides clear and actionable suggestions as to the selection and planning of green infrastructure at different scales and identifies considerations for implementation based on type of practice and specific geographic considerations. Each topic details an assessment of barriers and potential challenges and includes case studies that show how they can be addressed.

About the AuthorThe Water Environment Federation is a not-for-profit technical and educational organization of 33,000 individual members and 75 affiliated Member Associations representing water quality professionals around the world. Since 1928, WEF and its members have protected public health and the environment. As a global water sector leader, our mission is to connect water professionals; enrich the expertise of water professionals; increase the awareness of the impact and value of water; and provide a platform for water sector innovation.
