Michael E. O'Hanlon : Healing the Wounded Giant: Maintaining Military Preeminence while Cutting the Defense Budget before purchasing it in order to gage whether or not it would be worth my time, and all praised Healing the Wounded Giant: Maintaining Military Preeminence while Cutting the Defense Budget:

4 of 5 people found the following review helpful. Great and ApproachableBy The Book WheelI read this for a forum with Mr. O'Hanlon in grad school and I enjoyed it. It's very informative and easy to read - not at all overwhelming.

There are also a lot of graphs and tables if you prefer visuals. 2 of 3 people found the following review helpful. Not worth the money. By Army Guy. No new ideas, simply restates what has been said and pays very little attention to sequestration effects. The writer is a Brookings guy who is used to getting paid for restating what he hears from others. Not worth the money for 80 page pamphlet. 1 of 6 people found the following review helpful. MORE CRAP FROM A WARMONGER and PENTAGON APOLOGIST!!! By Terrence Paupp. This book is a pro-war manifesto by an American who has a history of supporting US Hegemony. O'Hanlon supported National Missile Defense (NMD) in one previous book--- which actually an aggressive system for war-making. The whole Pentagon is a corrupt mess-- with bad bookkeeping. This book, like O'Hanlon's Other books, is crap, crap, crap!!! Don't waste your money on this book!!!!

President Barack Obama survived a tenuous economy and a toxic political environment to win re-election in 2012, but the bitter partisan divide in Washington survived as well. So did the country's huge fiscal deficit. In this, the latest in a long line of Brookings Institution analyses of the defense budget, Michael O'Hanlon considers how best to balance national security and fiscal responsibility during a period of prolonged economic stress and political acrimony. Even as the world remains unsettled, from Afghanistan to Iran to Syria to the western Pacific region, O'Hanlon explains why the large defense cuts that would result from prolonged sequestration or from deficit-reduction projects such as the Bowles-Simpson plan are too deep. But the bulk of his book represents an effort to look for greater savings than the Obama administration's 2012 proposals would allow. Praise for the work of Michael O'Hanlon: *The Opportunity*: "A practical and hard-headed analysis of how another Strategic Arms Reduction Treaty might be achieved" — *Financial Times*; *The Science of War*: "Timely, thoughtful, and full of insight. A signal contribution to the field." — General David S. Petraeus, U.S. Army; *A Skeptic's Case for Nuclear Disarmament*: "O'Hanlon expertly unravels the myriad threads of the often abstruse disputes about nuclear weapons and disarmament." — *New York Times Book Review*

About the Author: Michael E. O'Hanlon is the director of research for foreign policy at the Brookings Institution, where he holds the Sydney Stein Jr. Chair and is a senior fellow with the Center on 21st Century Security and Intelligence (21CSI). His previous books include *The Opportunity: Next Steps in Reducing Nuclear Arms*, with Steven Pifer (Brookings, 2012); *Bending History: Barack Obama's Foreign Policy*, with Martin Indyk and Kenneth Lieberthal (Brookings, 2012); *A Skeptic's Case for Nuclear Disarmament* (Brookings, 2010); and *The Science of War: Defense Budgeting, Military Technology, Logistics, and Combat Outcomes* (Princeton, 2009).
