Thomas W. Hertel, L. Alan Winters : Poverty and the WTO (Trade and Development) before purchasing it in order to gage whether or not it would be worth my time, and all praised Poverty and the WTO (Trade and Development):

Poverty reduction is deemed to be a centerpiece of the Doha Development Agenda currently being negotiated under the auspices of the WTO. Yet there is considerable debate about the poverty impacts of such an agreement. Some are convinced it will increase poverty, while others are equally convinced that it will lead to poverty reduction. This book

brings the best scientific methods to bear on this question, taking into account the specific characteristics embodied in the Doha Development Agenda.
