Sheila Godfrey : Principles and Practice of Electrical Epilation before purchasing it in order to gauge whether or not it would be worth my time, and all praised Principles and Practice of Electrical Epilation:

2 of 2 people found the following review helpful. Informative, Indepth Needed!By KeishaI'm a self taught Electrologist who needed a bit more knowledge for my new epilator. I didn't want to spend thousands of dollars on a class and still not know the real ins and outs of what I really needed to know to grow. This book gave me a lot more than I expected and for that, I'm grateful.4 of 4 people found the following review helpful. FantasticBy GretchenI spent a lot of money going to a really, really bad electrology school and had to practically educate myself and this book among others and videos really helped me to become a better electrologist.0 of 0 people found the following review helpful. Electrology students teachersBy CustomerGreat book for teachers students to learn with.

Written for the practising electrolysis and student 'The Principles and Practice of Electrical Epilation' covers all

aspects of electro-epilation and takes into account recent changes and advances in training and technology during the past decade. This new edition brings these changes into focus. Topics covered in the third edition of this book include: * improved standards of training * the Blend technique of electro-epilation * the development of pre-sterilized disposable needles * training * health and safety at work. A knowledge of endocrinology, the structure and growth cycle of hair, the skin, hygiene, electricity and basic first aid is essential to an understanding of why hair growth occurs, and this problem - which causes distress to very many people - can be treated both safely and efficiently. The book covers all these topics, and also gives advice on how to set up your own practice.

'excellent content for Electrologists at NVQ 3 and Diploma level. Excellent section on the Endocrine System. Very clear accessible information.' Head of Beauty, Exeter College
