Jan Abel Olsen : Principles in Health Economics and Policy before purchasing it in order to gauge whether or not it would be worth my time, and all praised Principles in Health Economics and Policy:

Principles in Health Economics and Policy is a clear and concise introduction to health economics and its application to health policy. It introduces the subject of economics, explains the fundamental failures in the market for health care, and discusses the concepts of equity and fairness when applied to health and health care. Written for students and

health professionals with no background in economics, the book takes a policy-oriented approach, emphasising the application of economic analysis to universal health policy issues. It explores the key questions facing health policy-makers across the globe right now, such as: How should society intervene in the determinants that affect health? How should health care be financed? How should health care providers be paid? How should alternative health care programmes be evaluated when setting priorities? With relevant exercises and suggested further reading lists at the end of each chapter, *Principles in Health Economics and Policy* is the ideal resource for both students and health professionals.

from previous edition: "The book succeeds in explaining how health economics can be useful and how a better understanding of the depth of the problems that society faces in the distribution of health care can help us address problems in a systematic and incremental fashion... it is a remarkably comprehensive yet accessible text and should prove to be a valuable addition to [the] bookshelf." --*International Journal of Epidemiology* May 2003 "... interesting, easy to read, and enlightening about economic theory and its application to healthcare... The subjects are presented in a logical, easy to follow sequence, each chapter building appropriately on those that precede it." --*Doody's Journal* July 2003

About the Author Dr. Jan Abel Olsen is Professor at the Institute of Community Medicine at the University of Tromsø, and the Institute of Health Economics and Management at the University of Oslo, Norway.
